- Provided UI customization and updated in play store on regular basis.
- Developed demo app for pepper robot using qisdk.

Kotlin Developer (Intern)   Feb '21 - Mar '21
Flying-Bird BD

A newly introduced e-commerce site.

Job Responsibilities:

- Developed app for the e-commerce site.
- Implemented changes using retrofit to make the app responsive that collaborates with the website.
- Introduced features and updated app in play store whenever needed.

PROJECTS

MBSTU Bus Tracking System

Overview:

- Mainly the system consists of two apps.

- The driver app fetches the location data on its' way and on the other end the student app pulls out the location from database and shows the result in the map.

- Used location provider client to fetch the location of bus.
